

OPzS2-200 XYC Electronic: The Powerhouse for Industrial Energy Storage

OPzS2-200 XYC Electronic: The Powerhouse for Industrial Energy Storage

What Makes OPzS2-200 Batteries Stand Out?

Imagine needing a battery that's as reliable as your morning coffee machine - that's the OPzS2-200 XYC Electronic series for industrial applications. These 2V200Ah flooded tubular lead-acid batteries are the Swiss Army knives of energy storage, combining ultra-deep cycle capability with 25+ year service life. Unlike standard AGM batteries that throw in the towel after 800 cycles, OPzS2-200 units can handle over 1,500 deep discharges while maintaining 80% capacity.

Technical Superpowers

Voltage Stability: $\pm 1\%$ fluctuation even at 95% depth of discharge

Temperature Tolerance: Operates from -40°C to $+60^{\circ}\text{C}$ without performance cliff

Self-discharge Rate:
